EXPÉRIENCE

Tunisie Télécom , El Mourouj, Ben Arous   Jul 2021 À Août 2021

Participation in the installation and maintenance of telecommunications equipment, technical assistance to customers, and collaboration on various network upgrade projects.

FORMATION

Ecole Supérieure Privée d'Ingénierie et de Technologies, —
Bachelor's degree in Computer Engineering   **2021 to 2025**

The architecture of operating systems includes the Linux/Unix program, advanced software programming, C++ I and II, as well as data engineering and usability. Regarding web design and development, it includes the development of logical web pages and the design of database foundations and SQL.

GOMYCODE Tunisie, Tunis— *Graduate web developer*

Complete training in web development (front-end: HTML, CSS, JavaScript, React; back-end: Node.js, Express, MongoDB), skills in project management (Git, agile methodologies).

PROJETS

Gestion durable des excédents alimentaires   Jan 2023 to May 2024

A website for individual gastronomy and small businesses, developed with Symfony and MySQL for the backend, Bootstrap for the frontend, and other technologies. This application uses SSR for SEO and fast loading times, with Ajax and Axios for HTTP requests without page reloads.

Sustainable management of food surpluses   sep 2023 to Dec 2024

Design of a JavaFX application for sharing surplus food, featuring search, pagination, comments, and ratings. Integration of OpenStreetMapFX and JDBC with MySQL for data management, thus promoting responsible consumption by reducing food waste.

Optimized Court Management   Sep 2022 to Déc 2022

Development of a desktop application with Qt C++ for judicial management, including data optimization and visualization for the Court of First Instance of Tunis. Integration of MySQL for data storage and the use of SEO techniques for increased visibility.

Strategy Games & More   Jan 2021 to May 2022

Game developer specializing in C programming under Linux, expert in creating strategy games with puzzles and designing Arduino controllers.
